

TAIICHIO & WOLF PROJECTS is a company focused on "**Steel Supply Chain Management and Project Management Consulting**".

In the context of respecting the values and its policy on quality, environment, health and safety, TAIICHIO & WOLF PROJECTS expresses its commitment to:

- To satisfy the needs of our customers in terms of quality, cost, service and incorporation of the greatest possible technological value in our products and services.
- To support the development of our environment by making available all the resources at our disposal and always with a rigorous respect for the environment.
- To take all necessary measures to prevent damage and deterioration of the health of our employees, customers, suppliers, and visitors in general.

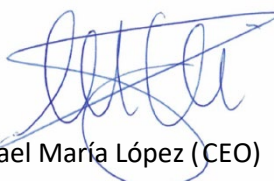

This commitment will be based on:

- Compliance with legal requirements, at local and international level, applicable in matters of quality, safety, and respect for the environment.
- Scrupulous compliance with the requirements of interested parties in general and of our customers.
- The application of the principles of continuous improvement in all our processes, through the involvement of all personnel.
- Effective prevention of health and safety risks.
- Integrity and respectful behaviour towards our colleagues, customers, suppliers and shareholders, including an strict anti-bribery and conduct codes.

The following will be used as instruments for the implementation of this policy:

- A management system based on the participation and involvement of staff, suppliers and customers.
- The establishment of objectives, goals and action plans for their achievement with the best possible allocation of our resources.
- Environmental protection and pollution prevention, sustainable use of resources, reduction and adaptation to climate change, protection of biodiversity and ecosystems.
- A comprehensive training plan for the development of people.
- Rapid and effective communication systems.
- Continuous assessment of risks and opportunities, as well as the adoption of measures to eradicate or improve them.

These Strategic Principles are assumed by the Management, which has the necessary means and provides the organisation with sufficient resources to comply with this Quality, Environment and Health and Safety Policy, and this is expressed and made public.

Rafael María López (CEO)
